PROFESSIONAL SUMMARY

Software Engineer with 1+ year of Experience in the fintech industry, specializing in Java-based application development and enterprise backend systems. Proficient in Java, Spring Boot, Hibernate, RESTful APIs, MVC architecture, and the Postilion Realtime Framework. Skilled in building RAD (Rapid Application Development) agents and leveraging vibe coding practices to accelerate development & improve productivity.

WORK EXPERIENCE

Software Engineer

Lise Infotech Pvt. Ltd. – On-site | June 2025 – Present

- Experience in **Postilion Realtime Framework**, developing and supporting ATM & POS Drivers for enterprise integrations.
- Designed and developed scalable backend applications using **Spring MVC and Spring Boot**, following layered architecture, design patterns, and industry best practices.
- Used **JDBC/JPA** for efficient database operations, query optimization, and transaction management.
- Played a key role in **enterprise-level issue analysis, root cause analysis (RCA), debugging**, and performance optimization in real-time, high-throughput production environments.
- Built and integrated **secure RESTful APIs** for internal and third-party system communication.
- Wrote clean, secure, **SonarQube-compliant code** aligned with enterprise coding standards.

Software Development Intern

Oak Tree Software Pvt. Ltd. – On-site | September 2024 – March 2025

- Developed RESTful APIs using for seamless communication between client and server.
- Designed and integrated frontend components to consume backend APIs and display dynamic data
- Worked on end-to-end full stack application development, handling both backend and frontend components.
- Collaborated with team members using version control tools and Gained hands-on experience in real-world project development lifecycle from requirement analysis to deployment.

SKILL SET

- Java (J2SE & J2EE)
- Spring Boot, Spring MVC and REST APIs
- Postilion Realtime Framework
- Junit, Mockito and SonarQube
- Docker, CI/CD (GitHub Actions), AWS(EC2, RDS)
- MySQL, JDBC, Hibernate
- Postman and Swagger
- Git, GitHub and SourceTree
- AI-assisted development tools (Codex, Claude Code, NotebookLM)
- RAD Agents, Vibe Coding (AI-assisted rapid development workflows)

EDUCATION

- ❖ Chameli Devi Group of Institutions, Indore (M.P.) (Aug. 2021 – June 2025)
Computer Science & Engineering | CGPA: 7.37
- ❖ Abhigyan International School, Sanawad (M.P.) (July 2018 – July 2021)
Higher Secondary Certification | Aggregate 76.6 %.

PROJECTS

- ❖ **Algorithm Visualizer**
The Algorithm Visualizer project is a web-based platform that allows user to provide understand algorithms through animations and step-by-step execution.
 - **Tech Stack** : Java, JDBC, Servlet, JSP, MYSQL, HTML, CSS, JavaScript.
- ❖ **RESTful API Development**
Designed and Implement RESTful web services to handle CRUD operations for user data. enabled efficient management of user profiles through API endpoints.
 - **Tech Stack** : Java, Spring Boot, Spring Data JPA, MYSQL, Postman, Logger, SonarQube.
